Presents a robust analysis of the contemporary trends, challenges, and opportunities in the inter-related areas of energy, environment and globalization, offering new and unorthodox insights that reflect the wide experience and wisdom of academic and industry experts from India

Provides convincing conclusions and arguments toward the formulation of feasible strategies that address various problems being faced by India as a fallout of haphazard and energy-intensive development

Offers suggestions for effective energy policies to help India meet its growing energy demands while keeping in mind environmental and growth aspects
