Abstract

In this modern era, world is changing very fast. Globalization has a great impact on every section and part of the society. Lahaul & Spiti District of Himachal Pradesh is well known for its unique and harsh geographical conditions. Transformation among the tribes of Lahaul cannot be ignored. On one side, the per capita income of the district Lahaul & Spiti is much (growing) better than the other districts of the state and on the other hand, after 70 years of Independence, the district is still (deprived from many basic amenities) struggling for basic facilities like road connectivity in the district throughout the year, mobile networks (connectivity) in the whole district and better health & education facilities in the district.

The paper is based on secondary literature and personal observations. It tries to discuss the changes in socio-cultural and economic life of tribes of Lahaul. The present paper is also an attempt to understand the Transformation among the tribes of Lahaul & Spiti district due to Globalization and Modernization.

Keywords: Tribal, Lahaul & Spiti, Transformation, Globalization, Tribes

Introduction:

Change is the law of nature. In life, every particle and substance, be it small-electron or big-mountain, is continuously changing. Every change and decay gives
